Mike,

I just wanted to send you a letter to tell you how pleased I am with the work that has been done to my house in regards to the solar package that my wife and I purchased from your company.

My pre-solar package which consisted of the Radiant Barrier, the solar attic fan and KVAR box works exactly the way that they were described to us. I was a little skeptical about the pre-solar package so I changed nothing that we did in July and August to see how it really worked, I kept both of my air conditioners set at 79 degrees and my pool motor running for 8 hours every night. My APS bill that I got on 08/11/09 for July right after my pre-solar was installed was for \$402.02 and I used 4289kwh for that month. On September 10<sup>th</sup> I received my bill and it was a total of \$270.00 and used a total of 2851kwh for August. Again I changed nothing that I did and that was the savings I realized from just the pre-solar needless to say my wife and I are eagerly waiting to get our solar panels installed so that we can keep seeing even more savings than we are now.

Sincerely,

Jeff and Devon Franklin

Peoria, Az
