To Salt River Solar & Wind

We would like to take time to let you know that after we had the pre-solar installed in summer of 2009, we saw a \$60.00 dollar decrease in our first bill and an additional \$30.00 decrease in our second bill. This was during the peak of summer when our bill should have been going up, but much to our surprise it continued to decline. We are very pleased with the efficiency of the pre-solar and are looking forward to the installation of our solar panels. Slade and the rest of the staff at Salt River Solar have been on top of everything and where out fast to take care of any additional items we wanted. We do not have any reservations about giving our top recommendation for all your solar needs to Salt River Solar & Wind.

Sincerely

Mr. \$ Mrs. Vargas
Litchfield Park, AZ
